Outcome of the conference participation

Description of the outcome of the conference presentation, including contacts made and potential for future collaborations.

The study was presented in one of the four Arenas dedicated to flash-oral presentations, the first day of the congress at 9:30 and the Arena was completely full of attendees. After the presentation several questions allowed us to extend in the time for discussion about the way in which our genomic epidemiology program is running in Almería. Along the meeting we received positive feedback from several attendees, looking for additional information from our study.

In addition to our presentation, we celebrated several networking meetings/chats with national (Germans trias i Pujol, Badalona) and international teams (Hamburg tuberculosis genomic epidemiology team; NIH, USA, San Raffaele Hospital, Milan; Borstel Research Centre, Germany, etc that might led to new potential collaborations in the future and to reinforce current collaborations)
